RES Americas and Arrowhead Wind Energy Open New Office in Beaver, Oklahoma

(Beaver, OK, April 7, 2008) Renewable Energy Systems Americas (RES) of Broomfield, Colorado and Arrowhead Wind Energy, LLC of Sayre, Oklahoma are pleased to announce the opening of their new office in Beaver, Oklahoma. The office will provide a service center for the RES/Arrowhead Beaver Wind Energy Project located in Southern Beaver County. According to company developers and managers, the office will serve as a central meeting place for project partners, landowners, contractors, and area officials.

"We are very pleased to be in Beaver," said Arrowhead President, Keith Rizley. "Our family homesteaded just south of Elmwood on Clear Creek. All of our Dad's family, including the late Ross Rizley, grew up in Beaver and attended Beaver public schools. It is a special place for us." Ross Rizley served four terms as Oklahoma's representative to the U.S. House of Representatives.

Heading up the office is Booker resident Nicholas Franklin. The Booker native is a graduate of Booker High School, Texas A&M, and the University of Texas School of Law. "We're pleased to have someone of Nic's caliber and talent," said Rizley. "Nic brings a new energy to our staff and knows so many people in the panhandle area."

Rizley underscored the importance of the Beaver office and its role in the partnership between RES, Arrowhead and the community. "RES and Arrowhead feel that having an easily accessible local office and being part of the community are critical to this project," stated Rizley. "We will continue to educate landowners and the community about wind energy and this exciting opportunity for Beaver County." Scott Caldwell, the Director of Development, South Central Region for RES, echoed these sentiments: "RES is excited to be working in partnership with Arrowhead Wind Energy and the citizens of Beaver County, and opening an office to facilitate interactions between key stakeholders is an exciting step in the development of this excellent wind resource."

RES is a fully integrated wind development and construction company, having built approximately 1,800 MW of wind energy projects throughout the country, with another 1,500 MW currently under construction. In 2007, RES constructed nearly 20% of the total installed capacity of wind projects that were built in the United States. The company has over 165 full-time employees working on a project portfolio of over 10,000 MW. Arrowhead Wind Energy, LLC is the wind development group of Arrowhead Resources, focused on developing the exceptional wind resources of Western Oklahoma. As a family-owned company based in Oklahoma and with over 20 years of experience in the land services industry, Arrowhead Wind Energy is a trusted name and has helped to educate hundreds of Oklahoma landowners about wind energy projects.

The RES/Arrowhead office is located at 720 Douglas. Staff at the Beaver office may be reached at 580-625-2424.
